

Vegetarian Food Recipe App Mock-Up

CSS545 (Initial MockUp)

Name – Sahithi Chimakurthi

Student ID - 2303017

Brief description -

The design of the vegetarian recipe app is simple and tailored for users seeking convenience, speed and highly relevant to the target demographic (busy individuals and health-conscious users). The home screen features easy navigation through key sections like popular recipes (based on ratings), spice level options (mild to hot), quick meals (prepared in less time), and saved recipes. Allergen warnings are displayed before showing any recipe, ensuring safety for users with dietary restrictions. On the recipe screen, important details such as ingredients, spice levels, and portion sizes are clearly presented, making it ideal for health-conscious users. With features like meal planning and saving favourites, the app meets the needs of busy individuals who want fast access to safe, well-organized meal options without compromising on health or convenience.
